

Sirs - I live in a remote are with only one radio station. If it weren't for XM Radio I would never know what was happening in my world. I really need and use the traffic and weather conditions channels and would be lost without them. PLEASE reject the NAB's petition 04-160. This petition not only infringes on XM Radios free speech rights but also on my rights as an individual U.S. citizen. This is only a ploy by local radio stations to restrict my freedom of choice.

Thank you for your time.
